Other Technical: Git Bash, VS Code, Visual Studio, Postman, Git, Google Analytics, Trello

EXPERIENCE

INTERROGAS, FULL STACK SOFTWARE ENGINEER

Mar 2022 – Present

Interrogas is an online platform guiding users through historical election data generated by Pollsters and providing forecast projections for upcoming elections based on this information, incorporating data visualization and georeferenced mapping.

- Constructed the analytics dashboard and integrated the use of apex charts in React to display data through dynamic interactive charts.
- Connected Google Analytics to the Interrogas web page in order to track page traffic and user behaviors on the Google Analytics website.
- Set up OAuth2.0 in React to allow users to sign in to an analytics page, using an approved Google account, and constructed endpoints to connect to the Google Analytics API and retrieve specified data for users.
- Created a Google service account and made API endpoint controllers, services, and interfaces in .NET(C#) to automatically submit proper credentials for site admins.
- Participated in daily stand-ups, code reviews, and debugged as part of a development team.

MARINE CORPS, COMBAT CORRESPONDENT

Sept 2010 – Aug 2014

- Earned the rank of Sergeant and an honorable discharge.
- Traveled to combat ranges to gather information and report on training exercises.
